

# SHANTEX

# Composite Decking Tiles

## Beautify your deck in as little as a single day.

A state-of-the-art do it yourself decking system designed to withstand the elements. Specifically created to be installed by any home handyman with few tools.

Bottom of tile

Top of tile

The interlocking mechanism of Shantex Decking Tiles means that it can be laid over virtually any leveled surface making it a “floating” deck. And since the tiles interlock, they are not screwed, nailed, or glued to the surface in any way, thus not damaging the surface underneath. In addition, since it is a “floating” deck and not a permanent one, it is very easy to take with you one day if you decide to move. A unique plastic grid base allows water drainage under the tiles. The open structure of the plastic base allows for good air

circulation, which prevents mold growth in damp and dark locations.

- Lasts a Lifetime
- Do-It-Yourself
- Low Maintenance
- Wood Rots - We Don't
- Cost-Effective Solution
- Environmentally Friendly
